Sample Outcome Evaluation Questions

Degree of programming success is determined by answering the following questions:

1. Did activities achieve intended outcomes/positive effects for clients?
2. How did the clients change, what were the consequences of these changes and what new objectives were established to respond to these changes?
3. Did the activities have any unexpected effects?
4. What groups or customers respond best/worst to the activities?
5. How can the planning of activities be improved?
